AIRLIFT® CYLINDER INSTALLATION

STEPS

1. Remove Upper Tier
   - Remove the upper tube section of the stand so only the bottom tripod assembly remains.

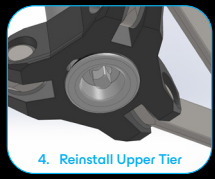
2. Flip Stand Upside Down
   - Turn the tripod assembly upside down to access the bottom tripod assembly

3. Install AirLift® Cylinder
   - Insert the AirLift® cylinder into the bottom of the tripod assembly.
   - Use a drum key to turn the cylinder until it seats and locks in place.

4. Reinstall Upper Tier
   - Reinstall the upper tube section of the stand.
   - The AirLift® system is now installed and ready to use by simply operating the height adjustment as normal.

9000X

3. Install AirLift® Cylinder



4. Reinstall Upper Tier
