Shipping Weight (kg)	13,1

Description

Featuring both injection molded cases and racks, our improved waterproof Fly Racks are lighter in weight and more affordable than previous models--all without compromising strength or durability. SKB's injection molded rack frames are manufactured alongside our iSeries cases in Orange, California. Rack frames are removable and fit easily into SKB's iSeries cases, where they are

protected by high quality PE foam that provides space for protruding knobs and buttons. At less than half the weight of standard shock racks, SKB Fly Racks feature iSeries Watertight injection molded cases that are under 157 linear cm to keep from being oversized--the perfect solution for flying or shipping delicate equipment. Convenient in-line wheels and a push button release pull handle provides easy transport. This case comes with Travel Sentry® Approved locking latches installed. Using Travel Sentry® Approved locks allows your luggage to be opened, inspected, and relocked by TSA authorities without damage. For more information, visit www.travelsentry.org. SKB iSeries Injection Molded Mil-Standard Waterproof Cases are molded of ultra high-strength polypropylene copolymer resin, featuring a gasket-sealed, water and dust tight, submersible design (MIL-STD 810H). Other standard features include a molded-in hinge, patented Trigger Latch® System, comfortable, snap-down rubber over-molded cushion grip handle, automatic ambient pressure equalization valve (MIL-STD-648C), and resistance to UV, solvents, corrosion, fungus and impact damage (MIL-STD 810H).
