19743

Tablet PC holder »Biobased«

Product variant

19743-000-55 - black

Technical Data

Angle of inclination	0° to 90°
Visibility	
Width	from 150 to 430 mm
Height	from 158 to 280 mm
Material	Bio-based plastic, steel
Type	black
Special features	also suitable for tablets in cases or protective covers; can also be screwed on to 3/8” thread connectors; freely rotates 90°
Price display	
Screw-on to	tube diameter 30 mm
Depth	18 mm

Universal tablet holder with a practical clamping mechanism for all tablets with an approx. size of 10" to 16". The tablet mount is made of bio-based plastic. These plastics contain a proportion of over 50% up to 100% of renewable plant-based raw materials. The use of renewable raw materials helps to conserve limited petroleum resources and reduce harmful CO2 emissions. More info on bio-based plastics at: bioplastic.k-m.de. The clamping range of the holder is between 158 and 280 mm. The holder is also particularly suited for tablets with a protective cover or case up to 18 mm thickness. The overlapping clamping jaws with integrated rubber pads provide for a secure hold and eliminate unwanted vibration noises. The function of the operating elements on the device is not impaired. An adjustable mounting bracket with felt padding provides additional safety when the tablet holder is positioned vertically and prevents the tablet PC from falling out even under heavy use. The holder can be swivelled and tilted, allowing each user to position it individually. The swivel movement can be adjusted from easy to tough via a clamping screw. The tablet holder can be rotated between portrait and landscape format without further ado, whereby independent

turning is prevented. The holding arm with clamping element is suited for attaching to tubes for up to 30 mm in diameter.
