Microtubes B1K

It's not the size that matters, it's what you do with it - introducing the new B1K distortion pedal

It takes a lot of people and drive to engineer a device: mechanical and electronics engineers, designers hungry to piece together a fine-looking gadget, plenty of prototyping, and the thirst to innovate. It must always be a step up.

We wanted to pack our legendary distortion pedal into a portable, functional, instinctive, and reliable form factor.

Smaller, but with intuitive and easy access to all controls.
Smaller, but with massive tonal characteristics.
Smaller, but far from a low-grade device.
Smaller, straightforward, and phenomenal.

We are proud to introduce our Microtubes B1K distortion pedal, the first of its kind from an all-new lineup.

Technical Specifications

Input Impedance 1 MΩ
Output Impedance 1 kΩ
Current Consumption ~30 mA
Voltage 9V DC (Center Negative)

Commercial information

MSRP: 159€

EAN Code: 6430054580755

Dimensions Unpacked: Width 50 mm (2 in) Height 100 mm (4 in) Depth 45 mm (1.75 in) Weight 205 g (0.45 lb)

Dimensions packed: Width 100 mm (4 in) Height 130 mm (5.2 in) Depth 65 mm (2.6 in) Weight 340 g (0.75 lb)
